# RH ENGINEERING CORPORATION provide companies with cost-effective and professional services

We, RH Engineering Corporation (established in 2011) have a team of experts for catering to various requirements of Cement, Sugar, Power, Feed Industry, etc such as Supply of Capital Equipment, Spare Parts, etc.

Considering the huge scope for growth in these industries across the globe we take this opportunity to introduce ourselves to your esteemed organization.

We believe that our reputation rests on the core values. We provide reliable engineered & timely solutions. We are conscious of our responsibilities towards our markets, society and the nation. Promoting and maintaining high standards of work are the pride of our profession.

## CEO's Message

**Pitchai Subramanian**

Esteemed Client,

We are pleased to introduce ourselves as a comprehensive mechanical engineering service provider and end-to-end product manufacturer. We have demonstrated expertise and ingenuity in delivering these services over the past 10 years.

Our range of products are dedicated exclusively to understanding and meeting the demands of international clients, clearly showcasing the credibility earned by our company in the global arena.

RH is a ubiquitous brand in the field of mechanical engineering not only in India as well as Overseas, with well-established presence in the Middle-East, Sri Lanka, Nepal and African countries.

We are truly an international organization of global outlook and reach. We are proud to enclose herewith, our group profile as a ready reckoner for your kind consideration. It is our spirited endeavor to showcase our enterprise to you and offer the best of our products and services for your utmost satisfaction.

# What can we do ?

## » Our Services

### PRODUCTS

- Fabrication of MS and SS products as per customer requirements and drawings.
- Design and Manufacturing of Steel Silos, Bins and Hoppers, etc for feed and food industries.
- Design and Manufacturing of Material Handling Equipment such as Bucket Elevators, Chain Conveyors, Screw Conveyors, Slide Gates, Divertor Valves, Air Slides, Mobile Ramps, Big Bag Unloading Stations, Buckets, etc
- Spare Parts for Feed Industry such as Hammers (Beaters), Screens, Dies & Roll Shells.
- Spares as per your drawings for any industry.

## » Facilities

We have extremely-contemporary production facilities comprising of latest CNC Laser Cutting, CNC Press Brake Bending, MIG Welding and Surface treatment services. All these facilities beneath one roof and professional work force of experts makes us the primary choice for the clients. We provide the best delivery schedules for fabrication of assemblies and product improvement.

## » Projects

We undertake projects based on the scope where-in turnkey assignments of steel fabrication with equipment are taken up.

## Our Strategic Approach

Rich and in-depth experiences,  
and vast resources

Prompt response  
and flexibility

Commitment to quality,  
health and safety

Expertise and skill of  
qualified manpower

Long-term relationship  
with esteemed customers

# Innovation

is one of the main pillars of our success story, today and

**in the future**

## Key for success

We are guided by our company characteristics: responsibility, enterprising as well as challenging & stimulating. Our company values: Quality, Reliability, Flexibility form our strategic direction and guide us when dealing with colleagues, customers or business partners alike.

## Value for money

Fabrication is extremely precise and critical in any engineering sectors. It takes great skill to cater to these sectors as the manufacturing standards are high and involves high degree of quality standards.

## Batch Cooker

Batch cookers are used for the batch cooking process as described in the processing section. The purpose of the batch cooker in the rendering process is to condition, sterilize, hydrolyze and dry the product.

If your company renders white meat (poultry), red meat, feathers, blood or a mixture of by-products the batch cooker is the perfect solution for you.

### Features

- High loading capacities compared to raw volume
- High performance shaft for short batch times
- Flexibility of adding additional Batch cooker(s)
- Both automatic and manual
- Heated shell and shaft
- Strong under frame for easy installation, maintenance and piping
- Frame mounted gear reducer and drive for strength and rigidity
- Small footprint
- Unit arrives complete pre-fitted
- TÜV / PED / GOST R/ Russian TR/ GOST K/ GOST B /GGTM

### Technical Details

Capacity loading from 1.100 kg up to 9.700 kg
